

East Cascades Audubon Society's 2019 15th Green Ridge raptor survey logged a total of 1,020 migrating birds of prey representing 16 species during 49 hours of observation for an average of 21 raptors per hour of observation during a very cool and wet fall.

Individual species:

21	Osprey
67	Bald Eagle
4	Northern Harrier
361	Sharp-shinned Hawk
137	Cooper's Hawk
3	Northern Goshawk
108	Red-tailed Hawk
2	Rough-legged Hawk
2	Broad-winged Hawk
2	Red-shouldered Hawk
16	Golden Eagle
5	American Kestrel
57	Merlin
4	Peregrine Falcon
3	Prairie Falcon
183	Turkey Vulture
31	Unid. Accipiter
5	Unid. Buteo
1	Unid. Falcon
8	Unid. Raptor

9/14 6 hours 57 raptors (Solo count by Peter Low)

9/21 8 hours 265 raptors (Count extended by one hour)

9/22 2 hours 2 raptors (Rained out at noon)

9/28 4 hours 58 raptors (Snowed out at 2:00)

9/29 (No count due to inclement weather)

10/5 7 hours 104 raptors

10/6 7 hours 106 raptors

10/12 7 hours 54 raptors

10/13 8 hours 375 raptors (Count extended by one hour)

Special thanks to Peter Low, Kim Boodie and Judy Meredith for their continuing dedication to the project, to the ECAS's board and president, to our partners on the Sisters Ranger District, to Chris Scranton and his trail brushing crew of one, to our frequent flyers, to 60 visitors/participants and to Jim and Sue Anderson for their moral support and inspiration.
