

Deschutes Land Trust/ECAS Bird Surveys

Annual update 2023

The Deschutes Land Trust/ECAS Bird Surveys continue to offer popular opportunities for our members to survey wild birds at DLT preserves. These ongoing surveys can happen year-round depending on weather and access to DLT preserves. After an initial training session, volunteers visit the preserves at their own convenience, and are welcomed to conduct surveys on an individual (or with a buddy) flexible basis. Volunteers learn first-hand how each of these protected lands contribute vitally important and safe habitat for our wild birds to thrive.

DLT continues to send all bird survey information to eBird.

New surveyors are always welcome.

2023

Total volunteer hours recorded – 374.5

Deschutes Land Trust properties surveyed:

Camp Polk Meadow Preserve

Indian Ford Meadow Preserve

Ochoco Preserve

Paulina Creek Preserve

Whychus Canyon Preserve

Willow Springs Preserve
